

Sage SalesLogix Compatibility Checklist

Version 7.5.4

Updated June 2011

Sage SalesLogix Compatibility Checklist Version 7.5.4

Updated June 2011

Contents

Key	2
Sage SalesLogix System Requirements.....	2
Mobile System Requirements (v5.5 and earlier).....	13
Mobile System Requirements (v5.6 and later).....	14
Mobile System Requirements (v11R1 and v1.1)	17
Notes	18
Important Information	18

Key

The software requirements show all qualified software for use with supported versions of Sage SalesLogix.

- ✓ - indicates Qualified. Component tested for Version.
- - indicates Not Qualified. Component supported but not tested for Version.
- NC - indicates Not Compatible for Version.

Sage SalesLogix System Requirements

Version	v7.2	v7.5	v7.5.1	v7.5.2	v7.5.3	v7.5.4
Windows Client						
Hardware¹						
Minimum memory/Recommended memory (MB)	256/512+	256/512+	256/512+	256/512+	256/512+	256/512+
Minimum processor/Recommended processor (MHz)	800/1GHz+	800/1GHz+	800/1GHz+	800/1GHz+	800/1GHz+	800/1GHz+
Free disk space for application files (MB)	200+	200+	200+	200+	200+	200+
<i>Remote Client requires minimum additional 250+ MB free disk space for database and sync files (Depends on subscription rules and account ownership which increase size of database)</i>						
Operating System

Oracle 11g	-	✓	✓	✓	✓	✓
Oracle 10g R2 (minimum of 10.2.0.1.0 required)	✓	✓	✓	✓	✓	✓
Oracle 9i R2 (minimum 9.2.0.4 required with ISO 8859-1 character set)	✓	-	-	-	-	-
<p><i>Oracle Client/OLE DB Provider Compatibility: Oracle Client software is a required component on each machine making a connection to a Sage SalesLogix Oracle database. Though the Oracle Client software may be cross-compatible between versions, it is assumed that, when possible, the installed Oracle Client software matches the Oracle server version. If the Oracle OLEDB Provider DOES NOT match the major release version of the database software, it is assumed that the OLEDB components will be the latest available from the vendor.</i></p>						
Email Servers

Notes

1. Hardware requirements are intended as a guideline. As Sage SalesLogix is highly customizable, hardware requirements will depend on the number of users, activities, database size, number of records, operating systems, and RDBMS, among other factors.
2. Supported, not qualified.
3. Active Mail features are not available.
4. Internet Explorer 8 must run in Native mode with Sage SalesLogix v7.5.2.
5. 64-bit systems must be set to run in 32-bit compatibility mode.
6. .NET Framework is required if hosting a portal (e.g., remote client).
7. . IIS must run in v6 mode.
8. Crystal Reports XI R2 SP3 is not compatible with Windows 2008.
9. Operating system versions are carrier specific. Be sure to use the operating system and/or upgrades provided by your carrier. The version of Desktop Manager required depends on the OS version of the device.
10. See related Hot Fix; applies to BlackBerry OS builds 5.0.0.386 and higher.
11. Sage SalesLogix Mobile should be installed separately from Sage SalesLogix. The platform should be installed on a dedicated server which is not functioning as a domain controller. The following are automatically installed and validated through the Mobile Platform Setup: ASP.NET 2.0 and J# 2.0 (for BlackBerry).
12. Microsoft Win32 command prompt utility for ad hoc, interactive execution of Transact-SQL statements and scripts requirement when database server is a different server than the Web server.
13. Personal Server is not available in v5.6 forward.
14. Works with Sage SalesLogix v7.5.3 with HF1, HF2, HF3 and SData core portal.

Important Information

For products not listed (for example, ERP Link, DynaLink, Visual Analyzer and Exchange Link) visit the SalesLogix Knowledgebase at [http:// support.saleslogix.com](http://support.saleslogix.com). Search by product name and the word "Compatibility".

Customers with active Maintenance & Support agreements may contact Technical Support if their environment includes components that have not been qualified. However, troubleshooting will be limited and no fixes related to the non-qualified component will be available.

Note that Sage generally does not perform additional qualification testing on a released version of Sage SalesLogix with newer service packs for operating systems and applications.
